* Download and upload time estimates based on maximum connection speeds. Actual speeds will vary. 100 times faster Internet comparison is based on average US download speeds of 6.613 Mbps according to Akamai's State of the Internet 2Q2012, where Greenlight offers up to 1,000 Mbps download. Actual Greenlight offers unlimited usage for Internet services and does not impose data usage caps on our customers.

I really want to let you know about an important opportunity we have to bring a Gigabit fiber-optic network to our neighborhood. **We could get Internet speeds up to 100x Faster* than a broadband connection to surf the web, stream video, & download files at speeds faster than we ever thought possible!** Even better, it's a much better value than the phone and cable company, and Greenlight is a local company with local sales, service and support!

- Up to one Gigabit download
- No data caps
- Plans start at \$50/mo
